A couple of other issues arise re: purchase of Links property. Part of that land had a 25 year lease didn't it? I believe it was the driving range area. That was intended for expansion use. How does a purchase affect that? Do we still want to do the landscaping portion of the odor control if this is going to be private property? Should that be part of the negotiations? And there has been interest on their part to run a pipe from their detention basin for runoff to our headworks in the event they back up enough in there in a storm event. This is still at the look at it stage but I would think if it is private and not our property anymore we would want as few "connections" as possible.
