Subject: RE: Water Provision Agreement - Nevada Links -Confidential

There is no reference to parcel numbers or acreage. Pursuant to the 1st Amendment to the Links Water Provision Agreement, Section 1.3 provides that the City will "...furnish water delivery credits to Nevada Linkks at the Links and Stallion Mountain golf courses based on \$0.20 per thousand (1000) gallons...not to exceed \$1,700,000..." So, we have just been providing what they have been using, without reference to acreage, etc. Under the terms of this Water Agreement, they have credits remaining, but that doesn't mean that such credits should continue after we lift the use restriction on the Links Golf Course. In its simplest terms, if they want to modify the Links agreements, we have every right to require that the Water Agreement be cancelled. This is a management decision--but I just wanted everyone to know that just because there are remaining credits now doesnt mean they have to continue.

Tom, Does the agreement reference the parcel numbers and acreage? If so, please forward that info to me. Thanks.

John J. Pfeiffer Jr.
